SKILLS

- JavaScript ES6
- Typescript
- React
- Redux
- AWS services
- GSP
- Typesense
- Node.js
- Express
- NPM, PNPM
- Lerna
- Serverless
- Responsive Design
- MUI
- Jest
- React Testing Library

EDUCATION

Software Engineering Immersion Program - Thinkful 2020

Master of Fine Arts (MFA),
University of the Arts, Poznań, Poland

SUMMARY

Innovative Full-Stack Software Engineer with 4 years experience, specializing in **React and AWS services**. Passionate about **problem-solving and collaboration**, I thrive in fast-paced environments, delivering **scalable, high-quality solutions** with a focus on **code excellence, test coverage, and user experience**.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer - OneView Commerce Remote/Boston
Jun 2022 - March 2025

- Played a pivotal role in developing the "Find It" project, a robust Point of Sale solution enabling seamless online and in-store purchases across web, desktop, and mobile platforms. Managed development timelines, participated in grooming sessions, and contributed to key technical decisions using React, Redux, Firestore DB, GCP Firestore functions, AWS Lambda, S3, SNS, SQS, and the Serverless Framework.
- Led the OVC data migration from PouchDB/Cloudant to Firestore and Typesense, ensuring a seamless transition with minimal disruption. Refactored features for improved maintainability, readability, and performance, while debugging production import issues to enhance system stability.
- Spearheaded performance testing for Firestore importers and Firebase Functions, evaluating data processing efficiency based on document size, volume, time constraints, and parallel execution. Documented key findings to optimize import performance and scalability.
- Spearheaded performance testing for Firestore importers and Firebase Functions, assessing data processing efficiency across document size, volume, time constraints, and parallel execution. Documented key findings to optimize import performance and scalability.
- Mentored an intern in coding best practices, multi-repository architecture, and product intricacies, providing guidance that led to a successful full-time hire.

Junior Software Developer - OneView Commerce Remote/Boston
November 2020 - June 2022

- Provided production support and bug fixes for Kroger's multi-repository SaaS and headless transaction engine, powering a Mobile POS built with React, Node.js, PouchDB, Cloudant, and AWS.
- Transformed enterprise-level requirements into functional software, breaking down large epics into agile, sprint-sized deliveries.
- Developed features for grouping pickup orders by delivery route and customizing receipt layouts and text, enhancing user experience and flexibility.

CERTIFICATIONS
